

The Interim Domain Chapter 09 Walk-Through

Choice walk-through by: Mordred93

The intent of this guide is to tell you where the points are, and in various sections of this document, how to unlock everything. This Developer does a lot of work with the dialog, and lots of changes to the dialog occur if you make particular choices.

It appears all life has ended and there is a backlog of people who are in the interim domain. Your job appears to be helping free their Qi and help them move on. People you don't help turn to remnants and their Qi is lost to the void after the final transition occurs.

As the game progresses (based on Chapters that content are written), when you start collecting Qi from people, but you have a chance to talk to many of the girls and progress their stories if you choose them from the prompts.

- You can pick a girl, several girls, or skip all the content for them each chapter as you can just pick "Elsewhere" repeatedly.
- Right now there are no negative repercussions for not picking a girl, so we shall see how this goes as the game progresses.
- As of Chapter 4, you can now start missing a girl's content by picking one over another. Not sure how this will play out as the whole story progresses.
- If you skipped a girl's story in a chapter, the story picks up where it is supposed to. Example, Chapter 2 you skipped a girl's story #1, but then pick the girl in Chapter 3, you see Story #1 instead of Story #2. Not sure how this will play out at the end of the game if you skipped a girl too many times, and don't see all their content.
- The way I am going to write this walk-through - I am showing the content in each chapter, and how you can select stories. As the stories can be selected in any chapter, I am creating a section for each girl, and the respective responses for each story. So for example, Kaitlin can be ignored in chapter 2, 3 and you can do all 3 of her stories in chapter 4. There are infinite possibilities, so I am not going to keep track of when a player wants to run a specific story.

- After each chapter, I am going to list the maximum possible points for each girl after each chapter if you were able to play them all. Since you cannot play them all each chapter, it is impossible to max out every girl by the end of each chapter.
- Since you can play any girl's story in any chapter, I am going to list each girls maximum points after each story.

Chapter 3 Notes:

The developer has made some changes to the game, and I highly suggest you restart from the beginning. Point values have changed, as well as some other variables. If you are trying to start Chapter 3 from an end of Chapter 2 save, you might have issues down the road.

Understanding Stats:

- Love: Assume this is how much the character loves the MC
- Like: Assume this is how much the character likes the MC
- Story: The number of stories told for that character. This shows how far you have progressed on their story line.

Understanding the choices:

Question Text (IE. what you are choosing)

Questions can be nested, so if you see a question on a line below another like this one is, it means you will only get this question (and resultant points, dialog, etc.) if you select the previous question above it.

Results of answering the question are highlighted green

Results where you can pick multiple items (like pick #1, then #2, etc.)

Results with no positive outcome (such as game over, start over, etc.)

Alternate Dialog: Dialog that is different, and you wont get to see any other way unless you make this choice.

Additional Play: If you pick this option, you get more story to play. This means that if you don't pick this option, there is less story to play, and your interactions are abbreviated.

Game Characters:

The MC:

- Michael Collins: Michael appears to be a regular guy, but after the “event”, appears to be able to talk to people stuck in the interim domain. Your role as an “Archon” appears to be helping people transition through the interim domain. People who don’t transition become remnants and are lost to the void after the next world transition occurs.

The Others:

- Mira: A member of the Entede, and sent by the Ur-entede to be your guide in the interim domain.
- Ur-entede: Appear to be the masters of the Interim Domain. Their goal is to help transition the Qi from people who die to the next life. They also appear to have a hand in making the transition of the world occur smoothly
- Kaitlin: Appears to be a school girl who is your neighbor. She is shy and has body issues due to medical issues.
- Tina: A young lady who is an athlete and college student. She is confident yet isolated due to her status as an athlete.
- Anita: A young lady who works at a lingerie store, and an adult night club. While not afraid of nudity, she really doesn’t like the life she lives.
- Marisa: A young lady who is a business analyst. She is a hard charger, who has no time for pleasantries or bullshit.
- Roe: A young lady who works as a school teacher/tutor. She grew up in a religious household and is very sexually repressed.
- Robin: A young lady who works at a coffee shop. She likes bowling and playing at an arcade.
- Sammy: A pizza delivery girl whom is a college student. She appears to be a girl trying to find herself through other experiences as she grows up.
- Allison: Former girlfriend of the MC. She is not real, but appears to the MC in various forms.
- Mina: A young student who works at the convenience store. She is a big aggressive with you sexually.
- Saaya: A young lady who is Kaitlin’s teacher.
